

REMARKS/ARGUMENTS

It appears from PAIR that amendments and remarks made in the PCT phase of this application were not entered, and so they are being included as attachments along with this response. To the extent that they need to be re-submitted in order to be considered, please consider this a request to amend this case as instructed in these documents.

The above re-listing of the claims is provided at the Examiner's request, so that the claims would be double spaced. As indicated above, the claims are as they appear after making amendments under Article 34 of the PCT.

With these amendments, it is believed the art cited by the Examiner (US5,907,943 to Eichbauer) is no longer relevant, as, for example, this reference does not contain any teaching of a propylene polymer as required in the amended claims. Accordingly, a notice of allowance of the amended claims is courteously requested.

Respectfully submitted,

/James T. Hoppe/
